Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant stated that there is a difference in surface finish between a broached surface and a milled surface. Applicant believes this surface finish to be patentable and believes the differences to only result from a broaching tool. Examiner stated the claim(s) as written are silent to any surface finish of the board(s) or any differences between the milled surface and broached surfaces. Applicant suggested submitting an affidavit stating the structural and surface differences between milled and broached surfaces. Applicant additionally suggested amending the claim to state a broached burr-free surface. Examiner notes that such amendment would required further/additional search and may not be entered as an after-final amendment. Applicant to consider filing an RCE.
